👤 PROFILE

Creative and passionate Front-End Developer offering **6+ years** of experience providing high-impact web solutions for diverse industry organizations. Skilled in designing, developing and testing web-based applications incorporating a range of technologies such as React, NextJs, Angular, React-native, Capacitor, Strapi, GraphQL, Ionic, etc... Aspiring to combine broad background with strong technical skills to excel as a Front-End Developer. Able to effectively self-manage during independent projects, as well as collaborate in a team setting.

💼 EMPLOYMENT HISTORY

Front end developer at Ibis dev, Remote

September 2023 — December 2024
Project - Marinas Cinch USA

- Collaborated in the design, construction and test of the marina web site (administration dashboards for marina Owners) for the Cinch project using NextsJs and Redux
- Collaborated to create strategic initiatives to design, code, and test solutions.
- Implemented Strapi as CMS for this project, providing a robust content management solution.
- Built a reusable Mapbox component that allows users to interactively place, rotate, and resize virtual buildings on a map, storing their coordinates and dimensions for subsequent API calls.
- Use of stripe element for online payments (Credit / debit Cards and ACH)
- Lead a small team of front-end developers to accomplish client requirements
- Helped to provide industry-leading solutions.

January 2023 — September 2023
Project - Brevity

- Developed and implemented a custom Angular component for budget management. This component enabled optimizing resource allocation by 20%,
- Implemented and maintained integrations with DocuSign to streamline contract management, ensuring compliance with security standards and applicable regulations.
- Effectively coded software changes and alterations based on specific design specifications using Angular as the main front-end framework.

May 2022 — January 2023
Project – Carryme

- As a front-end leader, I developed an international shipping platform for businesses in NextJs 12.3 and redux as a state manager.
- Internationalized the platform utilizing i18n and Strapi, with the support of Next.js localization.
- Supervised a team of 2 front-end developers to successfully complete platform development within the designated timeline, utilizing agile methodologies resulting in positive outcomes.

July 2021 — May 2022
Project - Guru

- Collaborated in the design, construction and test of multiple web sites (administration dashboard) for the Guru project using NextsJs, Apollo Client and Redux
- Collaborated to create strategic initiatives to design, code, and test solutions.
- Effectively coded software changes and alterations based on specific design specifications.
- Helped to provide industry-leading solutions.
- Worked on internal and external projects with great care.

React Developer at Karmasian, Remote
August 2020 — May 2021

- Date parsing helper.
- Correction of warnings in Veti React project
- Construction of the profile page and password change component
- Construction of several responsive components to be used in the PWA version of the app
- Visual improvements in different components of the application Implementation of internationalization technology
- Construction of mock endpoints using MSW(mock service worker) for every route in the API called by the Veti Project.

Senior front-end developer at Ocho te lo lleva corp, Valencia
August 2020 — October 2021

- Built the MVP multi-platform version of the Ocho la superapp mobile application using Ionic 5, Angular and Capacitor
- Worked to solve complex problems using the latest in Cloud, Mobile, and Web Technologies.
- Collaborated to create strategic initiatives to design, code, and test solutions.
- Lead the application migration from Ionic 5 to React native for performance and sustainability reasons

Front-end Developer at Gurutech Solutions, remote
May 2019 — July 2020

- Migration of the monolithic application "Eureka - Movistar España" from Symfony 2.8 to Symfony 4.
- Front-End development of the mobile app "appmypets" using Ionic 5 - React - Redux and capacitor.
- Give technical support to Rufner legacy project (symfony 2.8).
- Collaborated to create strategic initiatives to design, code, and test solutions.

Helped to provide industry-leading solutions.

Front-end Developer at Hash Tech LTD, Remote
February 2018 — May 2019

- Mobile App Migration from Ionic 3 to Ionic 4
- Construction of image cropper in mobile application built in Ionic
- Image cache service for Ionic 4 application using cordova storage plugin
- Monolithic web application construction and design using Symfony 4 / Twig / MySQL
- Collaborated to create strategic initiatives to design, code, and test solutions.

Web Developer at Cymath, Remote
March 2017 — February 2018

- Animations project for interactive math equations using Jquery
- Automate Instagram and Facebook poster
- Braintree integration
- Construction of several responsive components to be used in the mobile version of the app

🎓 EDUCATION

Computer Science degree, Universidad de Carabobo, Valencia
October 2013 — July 2019
